## **About MicroMod Automation & Controls**

MicroMod Automation & Controls is a full-service instrumentation and process control provider. Our skilled team of Field Service and In-House Technicians bring value to your organization. How? Through our ability and experience in reviewing, installing and starting entire systems – we bring a top-down perspective not often found in industry. This saves our customers money by reducing downtime, understanding the root cause analysis, and being trained in the solution to make it useable.

We are unique. There is no other automation and controls company like us. Our professionals bring a global process understanding, and decades of experience. We know enough to realize that if your process is unique, providing cookie-cutter solutions to a unique situation is not going to happen at MicroMod.

We solve your issues - at your site – and train your people on the process. Our Field Service Professionals are used to evaluating and solving issues with instruments and controllers other than MicroMod's - we link with most other instruments and controllers, and many times we are actually solving issues with our competitor's equipment. That's just who we are.

## **MicroMod Impact**

MicroMod provides the insight to help our customers as they look to grow and update their processes, by providing cost-effective, easy to implement solutions, not just ideas.

**Industries Helped**

- Hospitals and Universities
- Water/Wastewater
- Manufacturing
- Industrial
- Energy/Nuclear
- Food & Beverage
