

**TECHNOTE NUMBER:** TN-MOD-0011

**SUBJECT:** How to find the firmware version of MOD 30ML

**APPLIES TO:** MOD 30ML Controllers

**DATE:** September 2010

This TechNote describes how to look up the firmware version of a MOD 30ML controller from the front panel.

|   |   |  |
|---|---|--|
|    | <p>Press and hold the TAG key until the DEVICE display appears</p>  |   |
|  | <p>Press the PRV key twice. Line 6 should indicate ABOUT.</p>   |  |
|  | <p>Press the DOWN key once.<br/>The screen shows the firmware version loaded in the Identity Module. Take note of the information on lines 2 and 6 (this information combined provides the version number).</p> |  |
|  | <p>Press the TAG key twice to return to normal operation.</p>   |  |
